Size: 312 x 82 mm.

Finish: SAA.

MHL 65.05

# Letter Boxes

## MHL 65.06

### Anti-Arson Letterboxes

Crime Prevention Anti Arson Letterboxes are designed to remove the threat of arson by containing any flammable liquid that may be poured through your letterbox. Any resulting fire is then automatically extinguished by our in-built extinguishing system. The boxes are all made from fireproof sheet steel and have a neoprene seal surrounding the letter opening which makes the unit completely airtight.

Crime Prevention Products Anti Arson Letterboxes contain a thermo-sensitive polymer tube filled with the ozone friendly extinguishant FE-25 which is discretely placed within the letterbox and will put a fire out in less than 15 seconds, before it has the chance to spread. They are simple to install and designed to be fitted against the back of any standard letter plate.

Sizes: 550 x 320 x 100mm (Slimline)  
360 x 320 x 150mm (Chubby)  
656 x 320 x 200mm (Jumbo)

Finish: White.

MHL 65.33

# Window Security Fittings

## CHUBB RANGE

### Wood Hinged Windows

#### MHL 65.34

##### Window Security Bolt

Mortice bolt that fits into the window section and is shot into the frame.

Finishes: White, Brass.

Extra Length Keys Available: 114 mm.

MHL 65.34

#### MHL 65.35

##### Window Lock, Quick Fit

Lock is surface fixed onto the window section and is locked around the frame fixed staple by use of the key.

A clenching action helps to pull the window to the frame.

Finishes: White, Brown or Brass.

MHL 65.35

#### MHL 65.36

##### Window Lock, Push-To-Lock

Lock for surface fixing to the fixed frame which is locked onto the lock plate on the window section by pushing the lock barrel.

Easy to use 'Push to lock' system.

Released by Key.

Finishes: White, Brown or Brass.

MHL 65.36

#### MHL 65.37

##### Window Lock, Economy Easi-Fit

Lock is surface fixed onto the window section, locking into the fixed frame by use of the key.

Finish: White.

MHL 65.37

#### MHL 65.38

##### Window Lock

Surface fixed lock which locks on an oval locking plate with the turn of the key. Lock is mounted on the fixed frame.

Finish: White.

MHL 65.38

# Window Security Fittings

## CHUBB RANGE

### Wood Hinged Windows

#### MHL 65.39 Window Lock

Lock is surface fixed onto the window section and is locked into the striking plate on the fixed frame by use of the key.

Simple and cost effective.

Finishes: White or Brass.

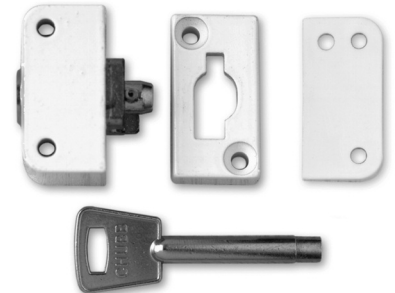

MHL 65.39

#### MHL 65.40 Window Lock

Lock is surface fitted to the fixed frame and is automatically locked on closing the window. The window and locking plate are released by use of the key.

Finishes: White, Brown or Brass.

MHL 65.40

### Wood Sliding Windows

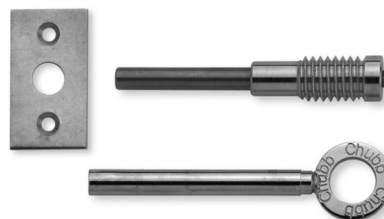

#### MHL 65.41 Dual Screws

The threaded lock barrel is fixed into the inner frame and the window is secured by locking the inner bolt into the barrel and frame using the key.

Can also be used in hinged windows.

Screw in fitting barrel.

Finish: Brass.

MHL 65.41

#### MHL 65.42 Window Lock

Lock is surface fixed across the window sections and the case is locked to the lock plate using the key.

Finish: White.

MHL 65.42

#### MHL 65.43 Window Lock

Lock is surface fitted and secured by a locking bar which locks both window sections in place. The bar is secured and released by the key.

Handy storage for locking bar when not in use.

One way security screws.

Finish: White.

MHL 65.43

# Window Security Fittings

## CHUBB RANGE

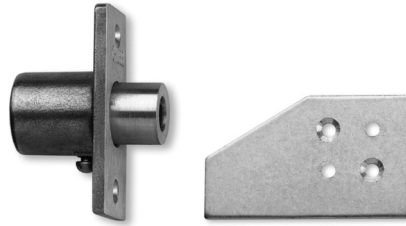

### Wood Sliding Windows

#### MHL 65.44

#### Window Lock

A key operated bolt is morticed into the outer window frame which when locked out will prevent the inner window from opening.

Finish: Brass.

MHL 65.44

### Metal Hinged Windows

#### MHL 65.45

#### Window Lock

A surface fitted lock for securing a window handle cockspur fastener. The lock slides into position to restrict the handle movement and is released by use of the key.

Finish: Gold.

MHL 65.45

#### MHL 65.46

#### Window Lock

Lock for surface fixing onto the window section. Bolt is thrown into the fixed frame by turning the catch, the bolt is then unlocked with the key.

Finish: White.

MHL 65.46

Robust padlock, totally concealed when locked. Vertical sliding shackle which comes through the staple hole making direct attack impossible. Available with either Ava 10 disk or 6 pin locking mechanism. Key retention when the padlock is unlocked. Hardened steel unsprung shackle. Suitable for use with MHL 65.109 padlock bar.

Size: 70 mm.

Keys: 3.

MHL 65.106

# Padlock Bars

## CHUBB RANGE

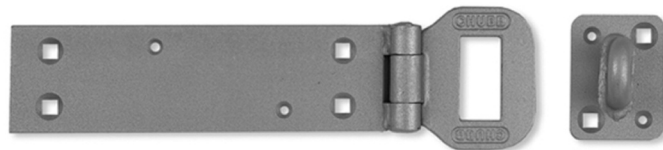

### MHL 65.107

#### Padlock Bar

A durable padbar with a hardened steel staple that bolts directly to the door.

Horizontal fitting.

For use with padlocks up to 16mm diameter shackle.

MHL 65.107

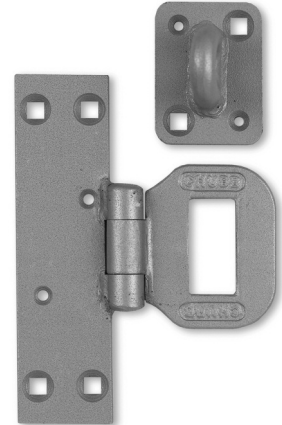

### MHL 65.108

#### Padlock Bar

A durable padbar with a hardened steel staple that bolts directly to the door.

Vertical fitting.

For use with padlocks up to 16mm diameter shackle.

MHL 65.108

### MHL 65.109

#### Padlock Bar

A high grade malleable iron padbar with a hardened steel staple.

Secured with high tensile clutch head screws fixed through heavy duty steel thrust plates to resist unauthorised removal.

Horizontal or vertical fitting.

For use with padlocks up to 16mm diameter shackle.

MHL 65.109

## ERA RANGE

### MHL 65.110

#### Fortess Locking Bar

The Fortess Locking Bar has a drill proof hinge-pin which prevents hacksawing, whilst the hardened forged-steel staple, concealed by the hasp, prevents hacksawing and wrenching. The bars are manufactured from heavy malleable iron castings for maximum strength. All fixing screws are concealed.

MHL 65.110

### MHL 65.111

#### Narrow Style Security Locking Bar

This locking bar is manufactured from heavy malleable iron castings for maximum strength. The hardened forged-steel hasp conceals the staple to prevent hacksawing and forced wrenching.

# Finger Protectors

## MHL 65.173

### Finger Protection Device

Roller system finger protection.

Can be fitted to most single and double action doors and is particularly suitable for automatic doors.

Provides effective protection against fingers being trapped on the hinge side of doors.

The strong fabric material, kept under constant tension covers the gap between the door and frame automatically when the door is opened.

Technical Data:

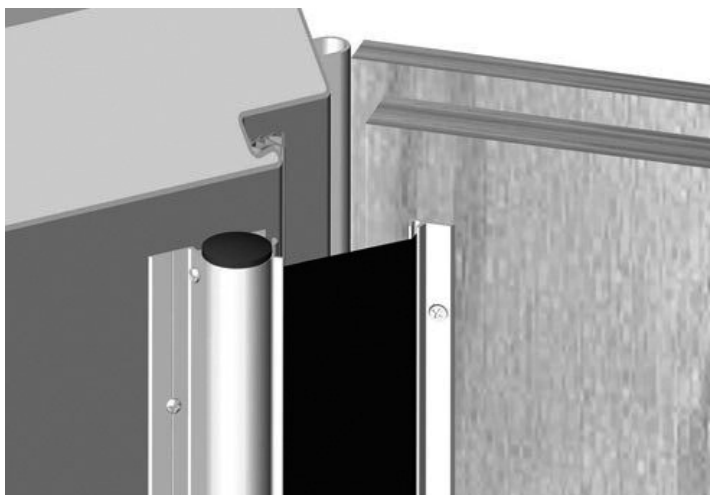

Roller system specifications:

Maximum length: 1925mm (standard size)

Minimum length: 290mm

Housing Finish: Silver Anodised

Fabric Colour: Black

MHL 65.173

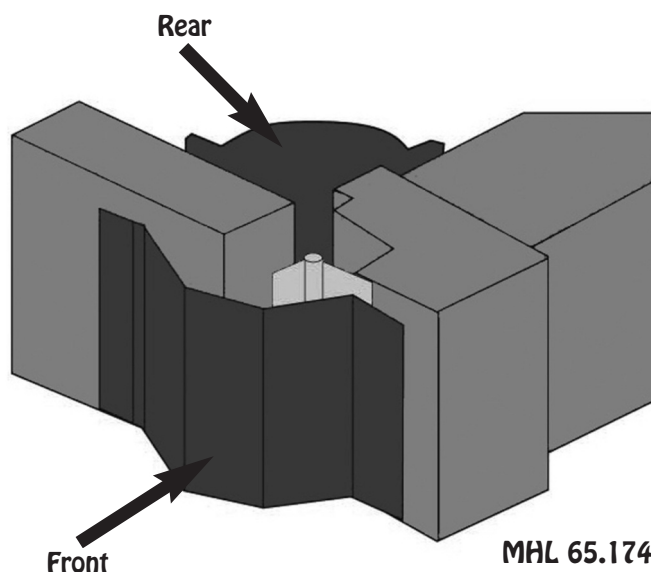

## MHL 65.174

### Finger Keeper Commercial & Finger Keeper Commercial Rearguard

Finger Keeper is an accident prevention product, to prevent the trapping of fingers in doors and many types of external gates.

The Finger Keeper device prevents finger trapping accidents by totally covering the gap that is created on the hinge or the rear side of a door when it is in the open position. The devices can be fitted to most types of doors including wood, metal and UPVC, swing pivot and concertina type doors which open to 180 degrees.

The devices are considered to be neat & unobtrusive. The product is extremely simple to install and has a long life expectancy and can be easily removed and refitted, 10 colours available.

MHL 65.174

MHL 65.174 (Front & Rear)

MHL 65.174-R (Rear only)

Colours Available:

Black, White - ex-stock

Red, Beige, Grey, Yellow, Blue, Teak, Beech, Brown - to order.

# Sealmaster Threshold Seals

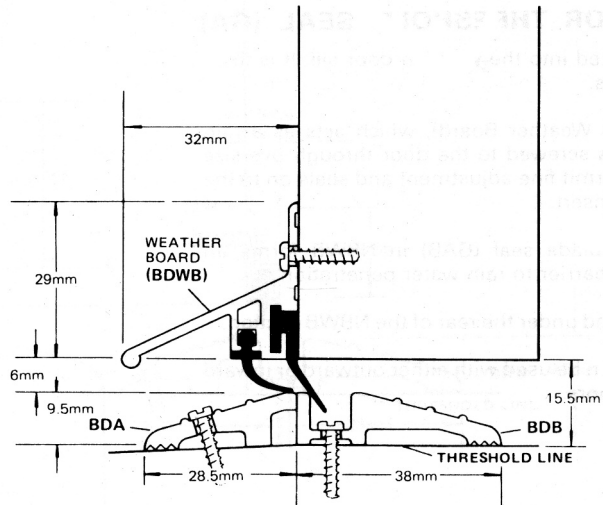

A FULL CATALOGUE IS AVAILABLE ON REQUEST.

## MHL 65.175

### EXTERIOR THRESHOLD SEAL (BD)

The threshold section is in two separate parts to facilitate fixing. The rear section, BDB, extends from frame to frame and is fitted tightly against the back of the stops. It acts as a barrier across the threshold, making a conventional water bar unnecessary. Any small amount of water which gets past the seal is caught by the trough and drained forward through a small duct. BDA is fitted up to and in front of BDB.

The holder BDWB (BD Weather Board) is screwed to the front of the door through oversize holes which permit fine sealing adjustment. It contains two blades, a storm seal, BDD, at the front which seals on to BDA, and the main seal, BDC, which seals on the inside of the trough in BDB when the door is closed, BDWB also forms a rain water deflector.

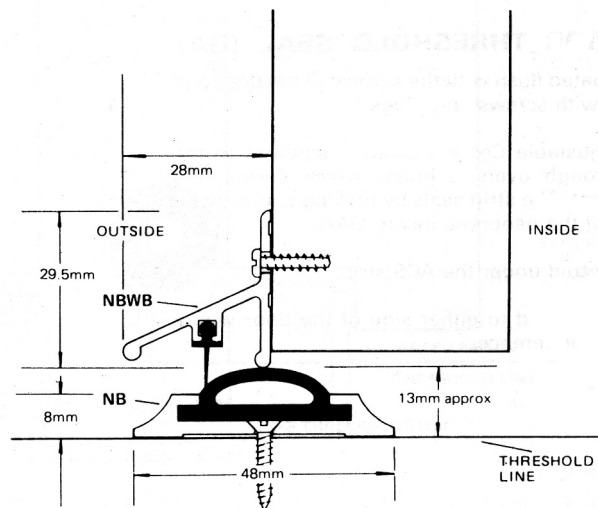

MHL 65.175

## MHL 65.176

### EXTERIOR THRESHOLD SEAL (NB)

In unexposed exterior positions NB is fitted to the threshold between the stops so the NBWB (NB Water Board), screwed to the front of the door through oversize holes to give fine adjustment, seals centrally on the neoprene insert, NBA. The blade seal, NBB, in NBWB gives added protection against rain penetration.

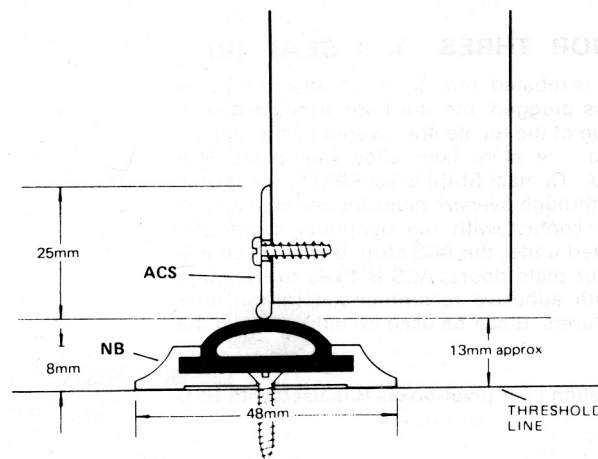

MHL 65.176

## MHL 65.177

### INTERIOR THRESHOLD SEAL (NB)

When used for interior sealing NB can be fitted to either side of the door, extending between the door stops on the closing side or the door jambs on the opening side. ACS (Adjustable Contact Strip) is screwed to the door through oversize holes which allow fine adjustment of contact with the neoprene insert, NBA. NB is centred in line with the ACS strip.

MHL 65.177

# Sealmaster Threshold Seals

A FULL CATALOGUE IS AVAILABLE ON REQUEST.

## MHL 65.178

### EXTERIOR THRESHOLD SEAL (GA)

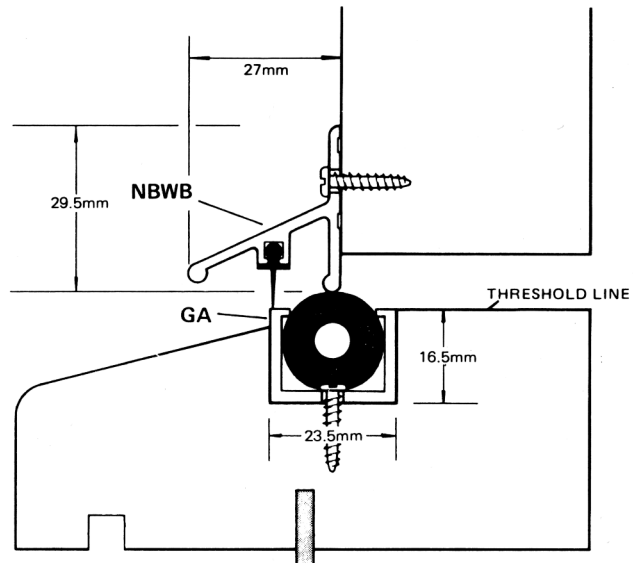

GA is rebated into the wooden door sill. It is fixed with screws.

NBWB (NB Weather Board), which acts as a rain deflector, is screwed to the door through oversize holes to permit fine adjustment and seals on to the neoprene insert.

A vertical blade seal (GAB) in NBWB forms an additional barrier to rain water penetration.

GA is centred under the rear of the NBWB section.

This seal can be used with either outward or inward opening doors.

MHL 65.178

## MHL 65.179

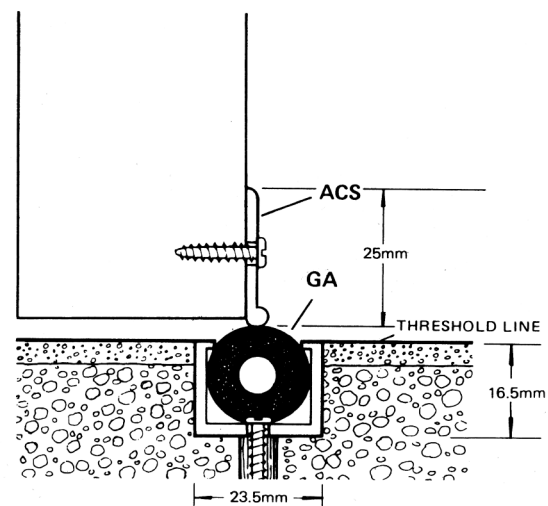

### INTERIOR THRESHOLD SEAL (GA)

GA is rebated flush with the surface of the floor and secured with screws and plugs.

ACS (Adjustable Contact Strip) is screwed to the door through oversize holes, which permit fine adjustment. The strip seals by making contact with the top of the neoprene insert, GAA.

GA is centred under the ACS strip.

GA can be fitted to either side of the door where there is a preference.

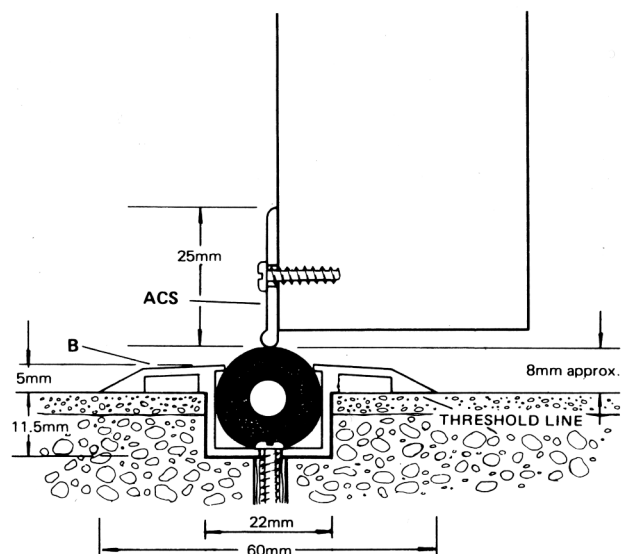

MHL 65.179

## MHL 65.180

### INTERIOR THRESHOLD SEAL (B)

The seal is rebated into the threshold and secured by screws plugged into the floor. Irregularities in the cutting of the rebate are covered by the sloping flanges of the aluminium alloy sealholder. ACS (Adjustable Contact Strip) is screwed to the face of the door through oversize holes for fine adjustment. It makes contact with the neoprene insert, BA. B is centred under the ACS strip. B is also suitable for armour plate doors, ACS is fixed to the glass doors with adhesive recommended by the door manufacturers. B can be used on either side of the door.

When sealing over pivot boxes B is used with BSD ends.

MHL 65.180

# Sealmaster Threshold Seals

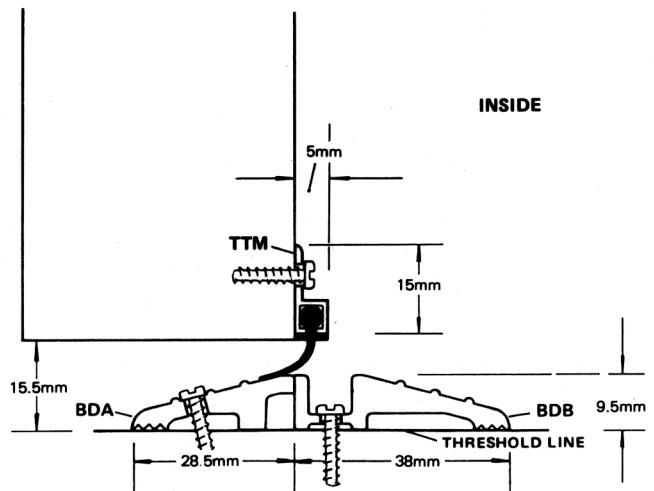

A FULL CATALOGUE IS AVAILABLE ON REQUEST.

## MHL 65.181

### THRESHOLD SEAL FOR OUTWARD OPENING DOOR (BD/TTM)

The threshold section is in two parts - BDA and BDB - to facilitate fixing. The rear section BDB is fitted between the door stops in line with the inside of the door. The front section BDA extends between the frames. The trough in the BDB section traps any slight amount of rain water which may penetrate and drains it forward through a duct.

A length of TTM stop seal, cut to fit between the door stops, is screwed to the inner face of the door. The blade seals along the BDA section when the door is closed and slides off when the door is opened.

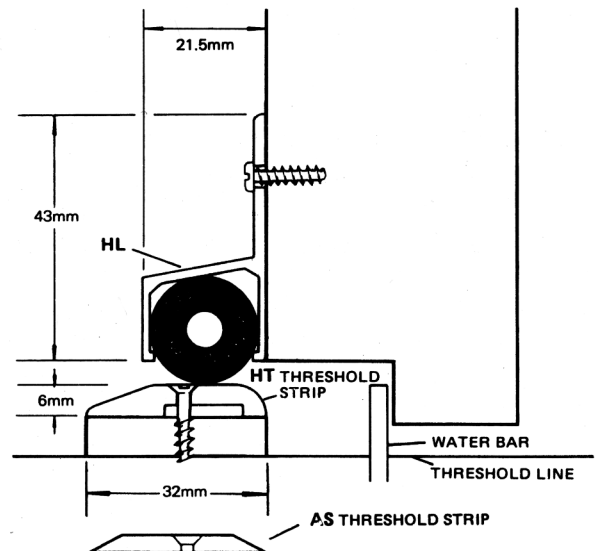

MHL 65.181

## MHL 65.182

### EXTERIOR THRESHOLD SEAL (HL)

HL is screwed to the door through oversize holes, to allow fine adjustment of the insert HLA on the threshold strip HT. This strip is mounted on a hardwood batten to enable the seal to clear the water bar and must be flat and level when fitted. HL is recommended for new work. Old, worn sills need to be levelled so that the seal can function correctly across its entire width.

An alternative threshold strip AS can be supplied if preferred.

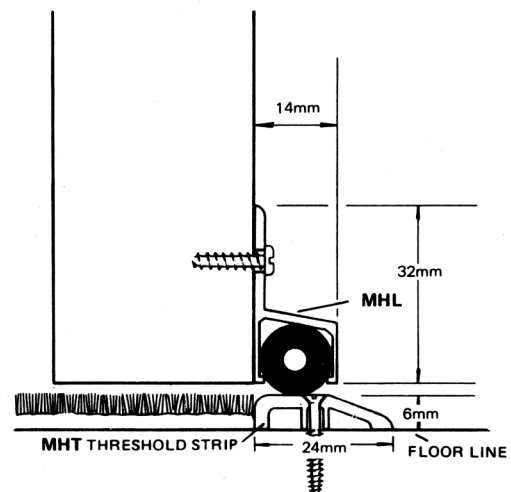

MHL 65.182

## MHL 65.183

### INTERIOR THRESHOLD SEAL (MHL)

MHL is screwed to the face of the door through oversize holes to enable contact made by the insert MHA on the threshold strip MHT to be adjusted accurately. The MHT strip must be straight across its entire width when fitted to ensure proper working of the seal, so the floor must be flat and level at the threshold.

# Weather Seals

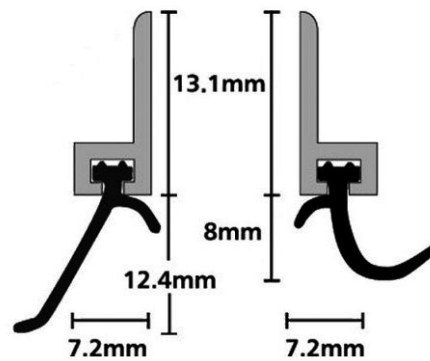

## MHL 65.184

### Standard ADS™ (Around Door Strip)

Suitable for inward opening doors. Maximum performance under severe weather conditions. Nitrile draught proof strips bridge the gap between door and frame. Quick, easy fitting. Curved rubber on hinge side prevents trapping. Robust and durable. Can be used as 'cold smoke seal'.

Sizes: Door kits comprising: 2 x 2057 mm (6' 9"),  
1 x 914 mm (3' 0") lengths.

Finishes: Aluminium, Gold Effect.

MHL 65.184

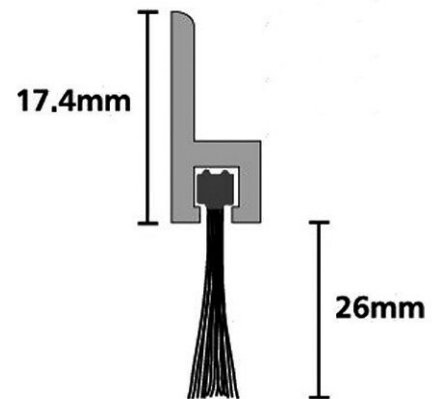

## MHL 65.185

### Heavy Duty BDS Brush

Effective protection from draughts under doors. 26 mm polypropylene brush. Seals gaps from 5 mm to 15 mm. Quick, easy fitting to any door. Ideal for sliding, folding, hinged and garage doors. Robust and durable. Also available with 2" brush for use on garage doors (7 foot lengths only).

Sizes: 838 mm (2' 9"), 2134 mm (7' 0")  
914 mm (3' 0").

Finishes: Aluminium, Gold Effect.

MHL 65.185

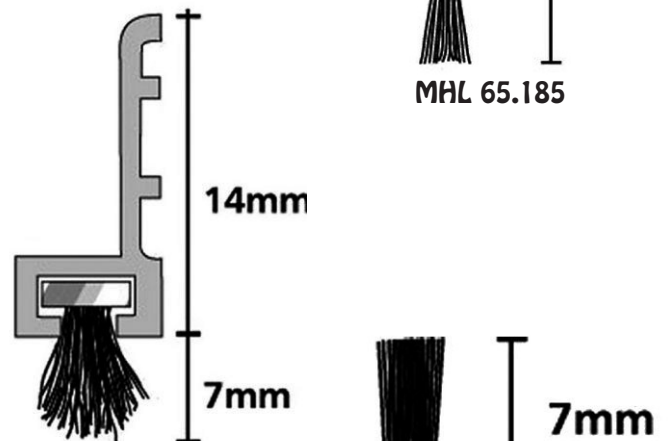

## MHL 65.186

### Slikseal™

Suitable for inward opening doors and outward opening windows. Lightweight and convenient draught excluder for around windows and internal doors. Effective performance against draughts. 5 mm polypropylene brush pile in PVC housing. Quick, easy fitting. Ideal for sash windows. Can be used as 'cold smoke seal'.

Sizes: Door kits comprising: 2 x 2057 mm (6' 9"),  
1 x 914 mm (3' 0") lengths.

Finishes: White, Brown.

MHL 65.186

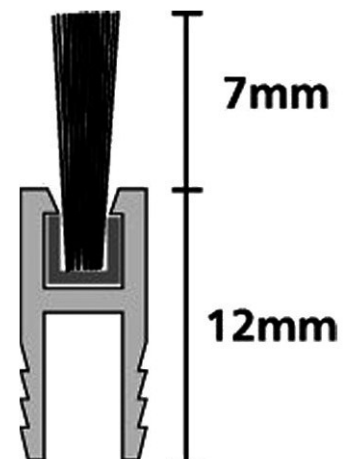

## MHL 65.187

### Centre Door Seal

Prevents draughts between non-rebated double doors. Effective performance against draughts. Concealed fixing, without fasteners. Fits into 5 mm groove along edge of door. Durable.

Size: 2.1 metre lengths.

Finish: Aluminium with black brush.

MHL 65.187

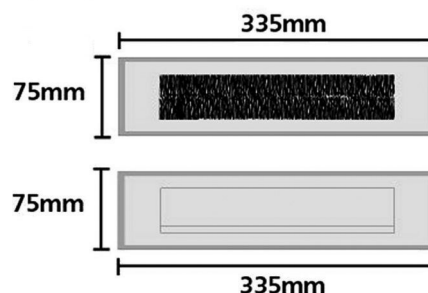

## MHL 65.188

### Letterbox Seal

Prevents draughts around letterbox. Effective performance against draughts. Intermeshing, twin polypropylene brush design. Quick, easy fitting. Durable. Supplied with hinged flap to cover brushes.

Size: 335 mm x 75 mm.

Finishes: White, Brown.

MHL 65.188

# Weather Seals

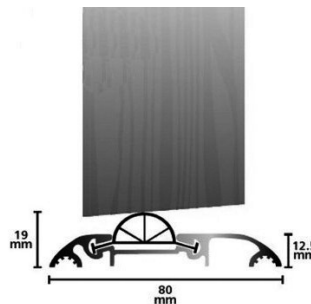

## MHL 65.189

### C.D.X.<sup>™</sup> (Mobility Easy Access)

Suitable for inward or outward opening doors. Versatile threshold providing easy access for light wheeled traffic. Low profile ramp ideal for Hotels/Schools. Robust and durable. Heavy duty aluminium construction with tough Nitrile rubber seal.

Sizes: 838 mm (2' 9"), 1524 mm (5' 0"),  
914 mm (3' 0"), 1828 mm (6' 0"),  
1219 mm (4' 0").

Finishes: Aluminium, Gold Effect.

MHL 65.189

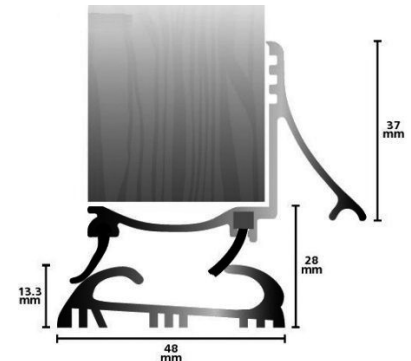

## MHL 65.190

### Trimline<sup>™</sup> (Mobility Easy Access)

Suitable for inward or outward opening doors. 13.5 mm profile. Curved upstands front and rear facilitate access for wheelchairs and prams. Double protection against rain and draught intrusion. Easy to fit. Face fixing as standard. Brush strip allows greater fixing tolerance. Robust and durable.

Sizes: 838 mm (2' 9"), 1524 mm (5' 0"),  
914 mm (3' 0"), 1828 mm (6' 0"),  
1219 mm (4' 0").

Finishes: Aluminium, Gold Effect.

MHL 65.190

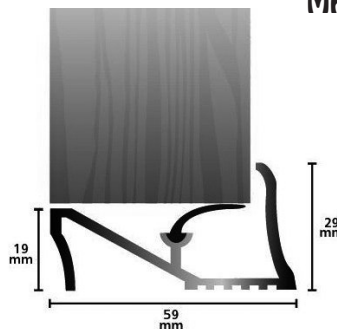

## MHL 65.191

### Lowline<sup>®</sup>

Suitable for inward opening doors. Excellent performance under severe weather conditions. Deep water collection channels. Easier access. Lower profile (29 mm). Robust and durable. Heavy duty aluminium construction. Minimal damage by foot traffic or door movement.

Sizes: 838 mm (2' 9"), 1524 mm (5' 0"),  
914 mm (3' 0"), 1828 mm (6' 0"),  
1219 mm (4' 0").

Finishes: Aluminium, Gold Effect.

MHL 65.191

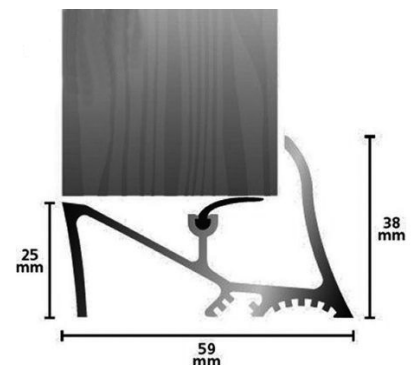

## MHL 65.192

### Superseal<sup>®</sup>

Suitable for inward opening doors. Maximum performance under severe weather conditions. Very deep water collection channels. Robust and durable. Heavy duty aluminium construction. Minimal damage by foot traffic or door movement.

Sizes: 838 mm (2' 9"), 1524 mm (5' 0"),  
914 mm (3' 0"), 1828 mm (6' 0"),  
1219 mm (4' 0").

Finishes: Aluminium, Gold Effect.

MHL 65.192

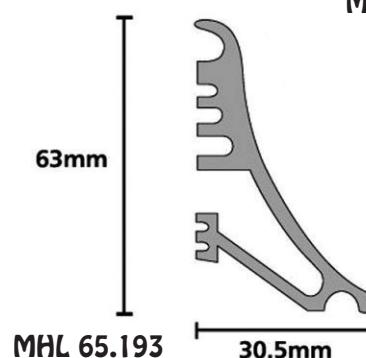

## MHL 65.193

### Rain Deflector

Suitable for inward opening doors. Designed to deflect water away from the door bottom either in conjunction with a threshold sill or to replace a weatherboard. Forms water tight seal against the door. Virtually maintenance free. Available in 2 depth sizes 63 mm for replacing a weatherboard. 32 mm for use in conjunction with Stormguard Sill.

Sizes: 838 mm (2' 9"), 1219 mm (4' 0"),  
914 mm (3' 0"), 1524 mm (5' 0"),  
1828 mm (6' 0").

Finishes: Aluminium, Gold Effect.

MHL 65.193

# Fire & Smoke Intumescent

Products are tested to BS 476 part 20:22 Fire Only complete with BS476 part 31:1 Cold Smoke Leakage giving a combined Fire and Smoke Seal. As with our fire only they are manufactured with a moisture resistant intumescent suitable for use in wet or dry areas. The range has been independently tested on a range of timber single and double leaf doorsets. Fixing is via a high tack acrylic backed self adhesive tape. As with all of our range they boast exceptionally sharp edges leading to visually appealing sight lines and easy installation.

## Benefits of Range

- BS 476 Pt 20:22 Pt 31:1
- Comprehensively tested
- Superb quality
- Wet or dry applications
- Quiet action
- Low resistance to ironmongery

# Fire Only Intumescent

## Compression gap.

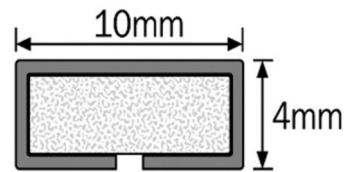

Probably the most under rated feature of our product. This is totally unseen being placed at the bottom of the strip deep in the timber groove allowing the product to slightly give when inserted into a tight gap. Generally the industry cannot supply undersized strip products.

Products are tested to BS 476 part 20:22 with a moisture resistant intumescent suitable for use in wet or dry areas on a range of single and double leaf doorsets. Fixing is via high tack acrylic backed self adhesive tape as standard.

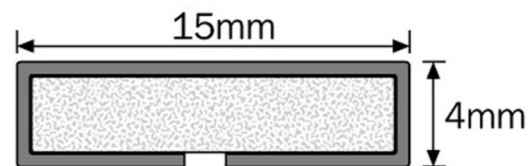

Exceptionally sharp edges lead to visually appealing sight lines and easy installation.
